Executive Summary

Situation

Jar's Passive-Saving Model Makes Saving Effortless For Students, But Gives Them **Few Reasons** To **Actively Open** Or **Engage** With The App Beyond The Saving Action Itself.

Complication

While Invisible Saving Reduces Friction, It Also Creates **Limited Recurring Engagement**, Leaving Users With Little Motivation To Check Their Progress Or Understand What Their Saving Behaviour **Means**.

Question

How Can Jar Create A Meaningful Reason For Students To Open The **App 2–3 Times A Week, While** Preserving The Effortless, Invisible Saving Experience At Its **Core**?

Answer

Create A **Personalized** Engagement Layer Using **MyJar Profile, Goal Run** And **Jar Perks** To Turn Saving Into **Insights**, **Actions** And **Rewards**, Giving Students Meaningful Reasons To Return While Keeping Saving Effortless.

S

Effortless Saving:
Round-Ups Automate Saving With Almost No Recurring User Effort.

Established Saving Habit:
Auto-Debit Enables Users To Save Consistently With Minimal Ongoing Effort.

W

Passive Saving, Low Progress
Users Save Automatically, But Small Amounts Make Progress Hard To Notice.

Weak Return Trigger
Saving Alone Gives Users Little Reason To Reopen Jar.

O

Make Savings Visible
Turn Passive Saving Into Clear Progress, Forecasts And Personalized Insights.

Drive Engagement
Use Goals, Milestones And Rewards To Create Meaningful Reasons To Return.

T

Attention Competition
Competing Financial Apps Make Sustained User Engagement.

Trust & Reliability
Negative Experiences Around , Withdrawals Or Perceived Losses Can Weaken User Trust.

Silent Savers Aren't Disengaged. Jar Gave Them No Reason To Come Back.

Why Does A Passively Saving User Have No Reason To Open Jar 2–3x A Week?

Silent Efficiency

- **Set And Forget Loop:** Saving Needs Zero User Action After Initial Setup.
- **The Habit Works:** Only 4 Of 1,500 Reviews Object To Auto-Debit; 67 Praise Habit.
- **Continuity Matters:** Disruptions In Auto-Save Functionality Can Create Friction In The Saving Journey.

Zero Pull Factors

- **No Clear Purpose:** Savings Are Directed Toward “Gold” Without A Defined Goal.
- **Limited Visibility Of Progress:** Round-Off Saves Average Only ~₹4.5 Per Payment, Making Progress Difficult To Perceive.
- **Limited Reinforcement:** Saving Lacks Visible Rewards Or Social Cues That Encourage Continued Participation.

Offboarding Focus

- **64%** Of 1★ Reviews Cite Money Taken/Stuck Or Fraud Claims.
- **Negative Trigger:** Cashout Reveals Net Loss (~9.5% Median), Damaging Trust

Payout And Charge Issues Are Out Of Scope For This Mandate; Tracked Strictly As Guardrails.

ROOT CAUSE Jar Automated Saving And Removed Every Trigger That Pulls A User Back. **The Only Strong Reason Left To Open The App Is To Take Money Out.**

Research Base & Key Findings

- **83%** Of Reviews Provide No Specific Reason, Limiting Visibility Into The Drivers Of User Sentiment.
- **0** Reviews Describe Balance-Checking As Their Only Use Case, Suggesting Limited Standalone Value.
- **22%** Users Who Share A Daily Commitment With A Friend Are 22% More Likely To Use The App Daily.

MyJar Profile (Solution 1)

MyJar Profile Tells Users Where They Stand.

What Is It?

Turns Saving Activity Into A Personalized View Of Where Users Stand, Where They Are Headed, And What Their Saving Behavior Reveals

MyJar Snapshot:
Savings Balance, Active Goal Progress, Consistency.

Goal Forecast
Estimates Projected Goal Date At Current Pace.

What-If Simulator
Adjust Saving Pace To Explore Date Changes.

MyJar Insights
Analyzes Saving Amount And Timing To Surface Meaningful Changes, Patterns And Milestones.

One Jar Balance Supports One Active Goal At A Time; Switch Active Goals Anytime.

How Does It Help?

Visible Progress: Converts Raw Saving Activity Into Simple Visual Metrics.

Tangible Goals: Shows Realistic Goal Completion Dates Based On Current Pace.

Self-Awareness: Identifies Meaningful Behavioral Patterns In Saving Habits.

Purposeful Pull: Useful Financial Clarity Instead Of Artificial App Gimmicks.

User Journey

1. Save Activity
User Adds Money
User Adds Money To Jar; Amount And Time Are Recorded.

2. Snapshot
Balance & Goal
Shows Current Savings, Goal Progress, And Saving Consistency.

3. Forecast
Pace & What-If
User Sees The Projected Goal Date And Adjusts Their Saving Pace To Explore Outcomes.

4. Insights
Behavioral Patterns
Jar Analyzes Saving Patterns And Highlights Key Changes, Milestones, And Insights.

5. Continuous
Feedback Loop
New Activity Updates The Profile; Insights Refresh On Meaningful Changes.

KPIs To Track

MyJar Engagement Rate
% Of Active Users Viewing Profile

Forecast Interaction Rate
% Of Users Trying Simulator

Insight Engagement Rate
% Interacting With Insights

Saving Retention
%Of Continuing Saves Post-View

Goal Run (Solution 2)

Goal Run Suggests What They Could Do Next. The User Decides.

What Is It?

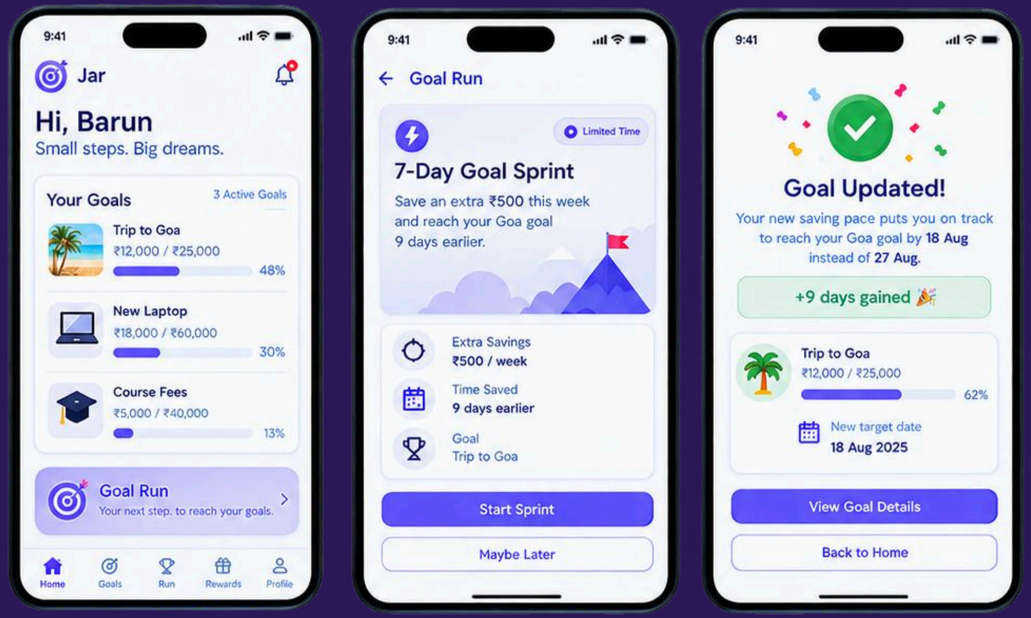

Goal Run Turns The User's Existing Savings Goal Into Personalized, Optional Actions That Help Them Make Tangible Progress.

Next Move
Suggests One Relevant Action Based On The User's Goal, Progress And Saving Behavior.

User Choice
Users Can Accept, Adjust Or Skip Every Suggestion. Nothing Is Mandatory.

Adaptive Engine
Learns From Actual Saving Behavior And Adapts Future Suggestions As The User's Behavior Changes.

Goal Sprint
Offers A Short, Defined Saving Push When There Is A Meaningful Opportunity To Accelerate The Goal.

1. Home
Access Goal Run from the home screen

How Does It Help?

Insight To Action: Turns MyJar Profile Data Into Relevant, Actionable Next Steps.

Adaptive Saving: Adjusts Suggestions To The User's Actual Saving Behavior.

Visible Progress: Shows How Each Action Changes The User's Goal Trajectory..

User Control: Keeps Every Action Optional, Adjustable, And Easy To Skip.

User Journey

1. Goal State
Profile → Goal Run
Goal, Progress, Forecast & Saving Behaviour Enter Goal Run.

2. Opportunity Detected
Finds An Opportunity
Identifies Whether There's A Meaningful Way To Improve Progress.

3. Next Move
Suggests One Action
Recommends A Relevant Action Based On The Current Goal State.

4. User Decides
Accept / Adjust / Skip
User Stays In Control Of The Suggested Action.

5. Progress Updates
Track & Update
Saving Activity Updates Progress, Behaviour & Forecast.

6. Reassessment
Learn & Reassess
Surfaces Another Suggestion Only When Something Meaningfully Changes.

KPIs To Track

Goal Progress Rate
% Of Users Making Measurable Progress

Goal Sprint Completion Rate
% Of Sprints Reaching Target

Suggestion Action Rate
% Suggestions Acted On

Goal Achievement Rate
% Of Users Reaching Savings Target

Jar Perks (Solution 3)

Create A Loop Of Saving That Is Rewarding, Engaging And Social.

What Is It?

Jar Perks Turns Saving From A Solo Habit Into A Shared Activity That Users Can Compare And Get Rewarded For. It Celebrates Consistency And Growth Rather Than The Amount Saved, With No Daily Pressure Or Spam-Like Notifications.

Fair Competition
Leaderboards And Friend Challenges Rank Users On Streaks And Consistency, Never On Money Saved.

Visible Progress
XP, Levels And Badges Make Long-Term Saving Feel Rewarding In The Short Term.

Earned Rewards
Streaks, Milestones And Challenges Unlock Partner Discounts That Users Choose Themselves.

Campus Benchmark
Shows How A User's Habits Compare With The Campus Average.

How Does It Help?

Reason To Return: Unlocked Rewards, Leaderboard Shifts And Friend Challenges Give Users A Reason To Come Back.

Peer Momentum: Friendly Competition Gets Whole Friend Groups Saving Together.

Fair For Everyone: Consistency Counts More Than Amounts, So Students With Smaller Budgets Are Never Left Out.

Emotional Stickiness: Levels, Badges And Rewards Earned Through Real Saving Make Users Feel Invested.

User Journey

1. Milestone Hit
Streak & XP
Saving Streak Or Milestone Reached. XP Is Earned, With A Level-Up Screen.

2. Reward
Choose Your Perk
Partner Rewards Are Revealed, And The User Picks From The Offers.

3. Social Pull
Challenges, Ranks
Friend Challenges And The Campus Leaderboard Rank Are Shown, By Consistency.

4. Compete
Campus Benchmark
Anonymous Campus Benchmark: "You Save More Consistently Than 68% Of Your Campus."

5. Loop
Next Level
A New Tier, Badge Or Seasonal Event (Diwali, Placements) Keeps Saving Going.

KPIs To Track

Reward Redemption Rate
% Of Unlocked Rewards Redeemed

Streak Retention Rate
% Of Users With A Streak For 4+ Weeks

Social Participation Rate
% Of Users Joining A Circle, Leaderboard Or Challenge

Day 30 / Day 60 Retention
% Of Users Still Active After 30 And 60 Days

RICE Prioritization

Solution	Reach (/10)	Impact (/10)	Confidence (/10)	Effort (/10)	Score (R*I*C/E)	Priority Tier
MyJar Profile	9	7	8	6	84	Foundation (Build First)
Goal Run	7	9	8	7	72	Core (Build Alongside)
Jar Perks	8	9	7	8	63	Amplifier (Build On Top)

Reach Explanation

MyJar Profile Reaches Users From Day One. Goal Run Reaches **Nearly Every Active-Goal** User, While Jar Perks Expands Reach Through **Rewards, Friends And Campuses.**

Impact Explanation

Goal Run And Jar Perks Directly Change Saving Behaviour Through Challenges, Streaks, Rewards And Social Pull. MyJar Profile Instead Builds **Awareness And Confidence.**

Confidence Explanation

Insights, Forecasts And Goal Tracking Are Proven Patterns. Rewards And Social Features Have Precedent In Similar Apps, But **Still Need Validation With Our Target Users.**

Confidence Explanation

MyJar Profile Is Primarily Data + UI Work. Jar Perks Is Significantly Heavier, Requiring **Partner Integrations, Rewards Infrastructure, Leaderboards And Social Features.**

Go-To-Market Strategy

Pre-Launch

- **Finalize Product:** Lock UX Flows, Reward Logic, Leaderboard Rules + KPI Tracking.
- **Build Ecosystem:** Onboard Campus Merchants And Partner Brands; Load The Initial Reward Catalogue.
- **Prepare Marketing:** Create Banners, Streak Cards, Posters + Ambassador Scripts.
- **Set Up Pilots:** Recruit Ambassadors And Launch **2–3 Test/Control Campuses** For A/B Testing.

Launch

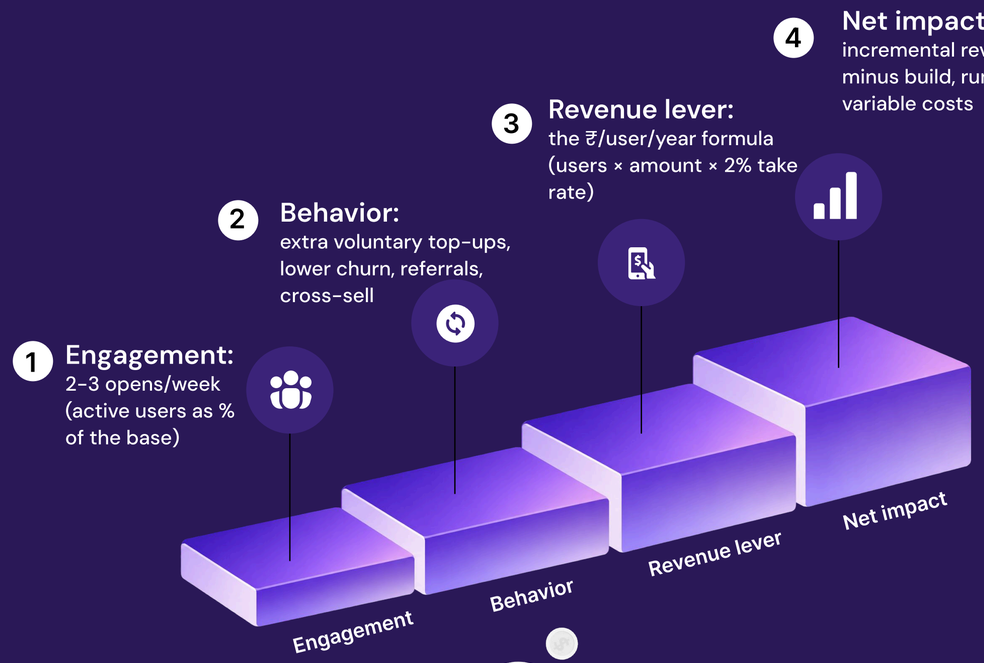

- **Phased Rollout:** Launch **MyJar Profile → Goal Run → Jar Perks** Across Pilot Campuses.
- **Drive Onboarding:** Use Pop-Ups, Banners + Event-Based Notifications To Introduce Key Features.
- **Activate Campuses:** Run Hostel, Class + Friend-Circle Challenges Around Key Campus Events.
- **Amplify + Learn:** Run Creator Campaigns With Milestone Cards And Collect Post-Reward Feedback.

Post-Launch

- **Track Performance: Monitor Retention, Participation, Redemptions + Day 30/60** Metrics.
- **Validate Results:** Compare Pilot Vs Control While Monitoring Opt-Outs And Savings Per User.
- **Optimize Experience:** Tune Rewards, Challenge Difficulty + Notification Timing Based On Engagement.
- **Scale:** Refresh Rewards, Add Merchants And Expand To New Campuses Through Inter-Campus Events.

Even With Zero Partner Income (Perks) Or Zero Cross-Sell (Goal Run), Each Solution Stays Profitable By Year 3.

Method

Illustrative base of 1M round-up users, ₹72/user/year baseline revenue, 3-year horizon, all assumptions in Appendix.

	MyJar Profile	Goal Run	Jar Perks
Net revenue per active user	₹57	₹51	₹75
Year 3 net impact	+₹120L	+₹97L	+₹196L
Payback	~18 months	~18 months	~17 mo
Extra gold AUM (Y3)	₹50 cr	₹44 cr	₹38 cr

- +₹196L in Year 3 means Jar Perks pays for itself within ~17 months and funds further growth.
- Extra gold AUM makes Jar stickier, so a copycat round-up feature has less to attack.

A combined view with the overlap haircut

Three solutions share the same users, so summing them overstates the impact.
